his countenance lighten up even in midst of pain to hear of the welfare of some little friend. Tokens of affection showered themselves upon him during his illness. A lady narrates the incident that a fortnight before he died she took her little niece, of whom he was extremely fond, to see him. He gave her some flowers, and, though suffering greatly at the time, insisted upon carefully fastening them to her dress himself.

Such is the brief chronicle of an important life. Not that much has been left in literature or science in evidence of what he accomplished. In the best sense of the term his career was imperfectly developed. He was at the point of attaining a position in life where many converging lines were meeting. A fairly lengthened span would doubtless have given opportunity for complete application of his powers. It is well known that he was on the threshold of a preferment which would have greatly increased his influence and widened and strengthened his position, when the last summons came with no uncertain sound. The spear fell from his nerveless grasp and the fight was over.

Stated Meeting, December 3, 1886.
